

Deployment:

Go into package-lock.json:

Under scripts add - "start": "node file where server is"

Create a file called Procfile:

Inside type - web: npm start

Create a const path = require('path')

Make endpoints for homepage and other pages :

```
app.get("/", (req, res) => {  
  res.sendFile(path.join(__dirname, "../client/index.html"));  
});
```

Create a port variable = process.env.PORT || (just in case port #)\

Push to github

Link git repository to heroku website

Deploy site
